

Dual Enrollment Advantages

At Credo Academy

1. Students can work together in person once a week and through email outside of class, which will aid in accountability and collaboration on homework.
2. Helps students to prepare for the rigors of college courses in a friendly homeschool environment, with affordable classes.
3. In class time, Credo hopes to have a parent facilitate discussions, help students follow the syllabus, and encourage accountability. However, it is the student and family, that is fully responsible to turn in work to the professor, and all grades will be given by the CCU professor.
4. For students taking the class with Credo, they will have access to early enrollment at CCU. This gives the opportunity to avoid a wait list, but also allows Credo students to be in the same class with the same professor.
5. Enter college with general education and elective courses completed.
